Weightanka[®] Assembly Instructions

PLEASE BE ADVISED: Before assembling the WEIGHTANKA system for the first time, it is highly recommended that Installers familiarise themselves with the component parts and carry out a test assembly and disassembly in a safe area away from the point of final installation. All component parts detailed in the operating instructions must be used in the assembly of the system. Should a piece be missing or appear defective do not continue to assemble and contact Kee Safety Immediately.

Step 1

Lay the rubber coated base weights with suction cups facing downwards onto roof surface approx 1m apart. Ensure that the closeset distance to any edge is not less than

Step 5

Slide the Bottom cross arm over diagonally opposite base weight pins ensuring that the threaded portion of the protruding set screw is facing upwards.

Step 9

Place the polyethelene washer on top of the pedestal..

Step 2

Screw the locating pins into the central tapped holes in the rubber coated base plates by hand until it is fully home.

Step 6

Slide the Top cross arm over diagonally opposite base weight pins.

Step 10

Place the PPE warning disc on top of the previously located washer and screw the eyebolt into the top of the Pedestal..

Step 3

Slide the stabiliser arm over the locating pins by adjusting the position of the adjacent Base Plates .

Step 7

Screw the pedestal onto the threaded portion in the centre of the two arms until it is fully home..

Step 11

Using the supplied Tommy bar Hand tighten the eyebolt firmly in place until it is fully located..

Step 4

Select the base cross arm and screw the M20 x 75 CSK Socket set screw into the centrally located CSK Boss.

Step 8

Place the Galvanised weights over the locating pins. Stack the number of weights according to the application, ensuring that the number of weights on diagonally opposing sides are
